

# System Gateway

It is the future. Humanity is spread across the solar system but is held in the iron grip of colossal megacorporations.

Corps control every aspect of your daily life and seek to redefine life itself with android labor. Their ubiquitous Network contains endless oceans of information, the Corps' greatest strength...and their singular weakness.

In this asymmetric card game, play as Runners, diverse hackers seeking to bring down or profit from the systems of the Lunar city of Heinlein, or as Corps, advancing their agendas to wring even more blood and profit from the lunar dust.

## MAKING A RUN

## GETTING IN

### Breaching Servers

Breaching a server allows you to access its cards. Always access one card at a time.

**HQ:** Access 1 card from the Corp's hand at random.

**R&D:** Access 1 card from the top of the Corp's deck.

**Archives:** Turn all facedown cards in the Corp's discard pile faceup. Access all of those cards.

**All Servers:** Access every card in the root of the server. You can intersperse accesses from a central server and its root.

### Accessing Cards

To access a card, follow these 3 steps:

1. Resolve abilities that meet their trigger conditions when the card is accessed.
2. You can use the basic trash ability or another "Access →" ability.
3. If you are still accessing the card and it's an agenda, you must steal it!

### Basic Trash Ability

You can always use this ability for any card you access that has a trash cost and isn't in Archives.

Access → Pay the trash cost of the accessed card: Trash it.

## DECKBUILDING

Deckbuilding lets you experience the game in a new way, whether by expressing your personality or efficiently executing a game-winning strategy.

When starting out in deckbuilding, it's best to pick a particular identity card and work around it. Each identity has a faction, a minimum deck size, and an influence limit.

### Your deck:

- Can include any number of cards from the faction of your identity.
- Can have cards of the same side (Corp or Runner) that do not match your faction, as long as the total influence of those cards is less than or equal to the influence limit of your identity.
- Must have at least as many cards as the minimum deck size of your identity.
- May have a maximum of 3 copies of any card (by name) unless otherwise noted on the card.
- If you are playing as the Corp, must contain the correct number of agenda points for your deck size.

## AGENDAS

Corp decks contain the agendas that define victory for both players. The agendas in a Corp deck must add up to a specific number of agenda points based on how many cards are in the deck:

Deck Size	Agenda Points Required
30 - 34	14 - 15
35 - 39	16 - 17
40 - 44	18 - 19
45 - 49	20 - 21
50 - 54	22 - 23

Decks with over 54 cards require 2 extra points for every 5 cards added.

## FACTIONS & INFLUENCE

Factions and influence restrict deckbuilding options, allowing each faction to have its own distinct play style. A card's faction can be identified by the color of its background, as well as a faction logo on the card. If a card has a white background and no logo, it is neutral and has no faction.

Each card's influence value is represented by a bar of small pips like the one shown here. If no pips are filled in, that card costs 0 influence and can be freely included in any deck. If the bar is not present at all, that card can only be used by its own faction.

This bar shows that a card has an influence value of 1.

Each **Corp** identity (ID) has a minimum number of cards required in their deck printed on the left of the text box on their ID card - A.

They also have the amount of influence available to them printed on the right of the text box on their ID card - B.

Each **Runner** ID has a minimum number of cards required in their deck printed on the bottom left of the ID card - C. They also have an amount of influence available to them printed in the bottom right of their ID card - D.

Pioneers in cybernetics and android intelligence, **Haas-Bioroid** rapidly progress agendas and operate with unparalleled precision.

**Anarchs** want to bring down the system. Whether political revolutionaries or free spirits, they demolish ice, wreck servers, and spread viruses in the name of change.

Subtle and dangerous as life itself, **Jinteki** Corporation touches every aspect of biotech, but their flagship product is humanlike clones.

**Criminals** are in it for the money, easily slipping undetected into vulnerable servers to enrich themselves at the corps' expense.

The largest media conglomerate in three worlds, **NBN** controls every data packet crossing the Network, and no runner will escape their notice.

**Shapers** just want to prove they can do it. Explorers, tinkers, and builders, their pride is versatile tools and insatiable curiosity.

**Weyland Consortium's** colossal profits come from the Beanstalk space elevator and their pet governments. Weyland is raw force, crushing runners with wealth and violence.

## BEYOND THE BASICS

Here are a few things to know that you didn't need while playing the starter game.

### Uniqueness (♦)

At any given time, you can only have one faceup installed copy of each "unique" card (marked with ♦ in front of the card's name). If the Runner installs or the Corp rezzes a second copy of a unique card, the older copy is trashed.

### Consoles

The Runner can only have 1 console installed at a time. If they install a new one, they must trash the older one.

### Trojans

*Botulus* and *Tranquilizer* must be installed on a piece of ice. Programs that can be placed on ice are called **trojans**. The ice with a **trojan** program on it is referred to as the host, and the program is said to be hosted on the ice. Hosted **trojan** programs are trashed if their host is trashed or otherwise leaves the play area. If a piece of ice is derezzed or moved but remains installed, any cards that ice is hosting remain hosted.

## PAID ABILITIES

Many cards have paid abilities that can be used at a player's discretion. They are always written "Cost: Effect" and can be recognized by the colon. Many paid abilities, such as those on **icebreakers**, are used during ice encounters. Others, like the one on *Regolith Mining License*, are actions a player can take on their turn.

### Botulus

Like an **icebreaker**, *Botulus* has a paid ability that breaks a subroutine, but since it is not an **icebreaker** and its ability does not have the "Interface →" flag, it does not have to match the strength of its host.

### Carnivore

Abilities with the "Access →" flag, such as on *Carnivore*, are "mid-access abilities". After resolving abilities that trigger when a card is accessed, the Runner can use either the basic trash ability or a mid-access ability on a card.

### Fermenter

The ♣ symbol on *Fermenter* (or any other card) represents a cost paid by trashing that card.

### Spin Doctor

*Spin Doctor* has a paid ability that allows the Corp to shuffle cards from Archives into R&D. The Corp can use this ability before a player's turn begins, before or after any action on either player's turn, or during a run. However, once the Runner approaches the server, there are no more opportunities to use paid abilities until the run ends.
